Auxiant Integrates with HealthJoy

Published on 05/01/2020

Auxiant is pleased to announce a partnership with HealthJoy.

This integration deeply embeds HealthJoy into our system. HealthJoy's AI-powered virtual assistant and concierges will be able to proactively assist members in their healthcare journey using claims and pre-certification data. Employees will receive quality care at a fair price, saving money for both the employees and their employers. This process will simplify an employee's path to care with the use of the HealthJoy's technology.
